QUESTION 17 – COMMIT

The screenshot shows the SQL Developer interface. The left sidebar contains the Navigator pane with categories: MANAGEMENT (Server Status, Client Connections, Users and Privileges, Status and System Variables, Data Export, Data Import/Restore), INSTANCE (Startup / Shutdown, Server Logs, Options File), and PERFORMANCE (Dashboard, Performance Reports, Performance Schema Setup). The main editor displays a SQL query in Query 1:

```
1 CREATE DATABASE IF NOT EXISTS banking_transaction;  
2 USE banking_transaction;  
3 START TRANSACTION;  
4  
5 UPDATE bank_transactions  
6 SET amount = 6000

8  
9 COMMIT;  
10 SELECT *  
11 FROM bank_transactions  
12 WHERE txn_id = 101;
```

The right pane shows the SQL Additions section with a message: "Automatic context help is disabled. Use the toolbar to manually get help for the current caret position or to toggle automatic help."
